To Whom It May Concern:

Sufco mines tire department, has been using AmerSeal in their underground applications since spring of 2009. Since we have started to use AmerSeal, we have seen a 30% reduction in tire usage. We have been able to get the full life out of the tires that have been treated with AmerSeal.

AmerSeal has become a valuable part of our preventative maintenance.

Using AmerSeal in our tires has drastically reduced the amount of downtime on our equipment and tire repair costs have gone down since 2009.

Sincerely,

Sufco Mine Tire Department
